PROFESSIONAL SUMMARY

Electrical Engineering graduate from IIT Bhubaneswar with hands-on experience building Python-based applications using Flask, SQLite, REST APIs, and Object-Oriented Programming. Skilled in backend development, database design, and problem-solving with a strong foundation in DSA and DBMS. Currently transitioning into Software Engineering and Backend Development roles.

TECHNICAL SKILLS

Programming: Python, SQL
Backend: Flask, REST APIs, OOP
Databases: SQLite, PostgreSQL
Web: HTML, CSS
Tools: Git, GitHub, Linux, VS Code, JSON
Concepts: DSA, DBMS, Authentication, Session Management

EDUCATION

Indian Institute of Technology (IIT) Bhubaneswar
Bachelor of Technology (B.Tech.) – Electrical Engineering

PROJECTS

Expense Tracker & Personal Finance Dashboard

- Developed a full-stack expense tracking application using Flask and SQLite with authentication, CRUD operations, budgeting, reminders, analytics, and CSV export.
- Designed relational database schemas and implemented session-based authentication for secure data management.
- Built dashboard insights and category-wise spending analysis to improve financial tracking.

Tech Stack: Python, Flask, SQLite, HTML, CSS, Git

Flashcard & Spaced-Repetition System

- Developed a flashcard learning application using OOP and the Leitner Spaced Repetition System.
- Implemented custom algorithms to schedule reviews based on user performance.
- Used JSON serialization for persistent storage of flashcards and progress tracking.

Tech Stack: Python, OOP, JSON

Developer Portfolio Website

- Built a responsive portfolio website to showcase projects, technical skills, and development work.
- Designed project navigation and structured layouts for better user experience.

Tech Stack: HTML, CSS

Solar Tracker Irradiance Optimizer

- Simulated a solar tracking system using MATLAB and Simulink with MPPT (P&O;) optimization.
- Evaluated photovoltaic performance under varying irradiance conditions using control-system modeling.

PROFESSIONAL EXPERIENCE

UNext Learning | Data & Operations Consultant | Mar 2025 – Jan 2026

- Managed lead and onboarding data to improve operational efficiency and reporting accuracy.
- Analyzed conversion metrics and business performance indicators to support decision-making.

Unacademy | Business Development Associate | Mar 2024 – Jul 2024

- Managed customer onboarding workflows and learner requirement analysis.
- Tracked performance metrics and improved engagement through consultative problem-solving.

Hygiene Big Bites | Kitchen Operations & Logistics Manager | Oct 2023 – Feb 2024

- Managed inventory operations and resource planning for daily business activities.
- Optimized operational workflows through data tracking and process improvements.

OPTCL | Power Systems Analysis Intern

- Analyzed power distribution datasets and evaluated system loading conditions for operational assessment.

LEADERSHIP & ACHIEVEMENTS

- Core Team Member – E-Cell, IIT Bhubaneswar.
- Varsity Basketball Player – IIT Bhubaneswar (2016–2018).
